Results-driven Java Developer Intern with hands-on experience in building scalable backend systems using Java, Spring Boot. Adept at developing RESTful APIs and microservices, optimizing performance, and collaborating with cross-functional teams to deliver secure and maintainable software solutions.

Passionate about backend development, cloud technologies, and crafting efficient, clean code that enhances user experience and business efficiency.

TECHNICAL SKILLS

- JAVA
- SPRINGBOOT
- REST API
- SQL
- DEBUGGING
- GIT
- HIBERNATE
- OOPS

WORK EXPERIENCE

Java SpringBoot Intern | Incedo, Gurugram

06/2025 – 06/2026

- Contributing to the design and development of scalable backend systems using Java and Spring Boot
- Implementing RESTful APIs and WebSocket-based real-time communication for interactive client-server features
- Assisting in the development of microservice-based architecture for modular and maintainable applications
- Writing clean, efficient, and testable code following SOLID principles and coding best practices
- Collaborating with cross-functional teams to integrate APIs and optimize backend performance
- Participating in code reviews, debugging, and unit testing

PROJECTS

Login & Signup System with Forgot Password |

- Developed a user authentication system using Java and Spring Boot that allows users to sign up, log in, and reset passwords securely
- Implemented authentication and authorization using Spring Security with encrypted password storage
- Built the “Forgot Password” feature to reset user credentials via email verification
- Designed and tested all endpoints with Postman to ensure reliable communication between client and server
- Integrated MySQL for persistent user data storage and managed application configuration with Spring Boot dependency

Employee Record System (CRUD Application).

- Developed a CRUD-based Employee Management System using Java, Spring Boot, and MySQL to manage employee records efficiently
- Designed and implemented RESTful APIs for creating, reading, updating, and deleting employee data
- Utilized Postman to test and verify API endpoints, ensuring accurate data flow between client and server
- Applied Spring Data JPA for database interaction and Spring Boot for rapid application development and dependency management

EDUCATION

Bachelor of Engineering in Computer Science

08/2012 – 07/2017

J.C.Bose University of Science and Technology, YMCA

CGPA:8.1

CERTIFICATION

- SpringBoot foundations
- Java programming
- Generative AI for Java
